

SARS-Related Coronavirus 2, Isolate hCoV-19/USA/WI-IRI-001/2021 (Lineage B.1.630)

Catalog No. NR-55697

For research use only. Not for use in humans.

Contributor:

Dr. Peter Halfmann, Ph.D., Associate Scientist, Influenza Research Institute and Dr. Yoshihiro Kawaoka, Ph.D., Professor of Veterinary Virology, Influenza Research Institute, University of Wisconsin-Madison, Madison, Wisconsin, USA

Manufacturer:

BEI Resources

Product Description:

Virus Classification: *Coronaviridae, Betacoronavirus*

Species: Severe acute respiratory syndrome-related coronavirus 2

Strain/Isolate: hCoV-19/USA/WI-IRI-001/2021

Original Source: Severe acute respiratory syndrome-related coronavirus 2 (SARS-CoV-2), isolate hCoV-19/USA/WI-IRI-001/2021 was isolated from a nasal swab from a human in Madison, Wisconsin, USA, in July 2021.¹

Note: Genome sequence information is provided on the Certificate of Analysis and includes an analysis of all sequence variations observed for each lot.

Comments: Under the nomenclature system introduced by GISAID (Global Initiative on Sharing All Influenza Data), SARS-CoV-2, isolate hCoV-19/USA/WI-IRI-001/2021 is assigned lineage B.1.630 (Pango v.3.1.16 2021-11-25) and GISAID clade GH using Phylogenetic Assignment of Named Global Outbreak lineages (PANGO) tool.^{1,2,3} The complete genome of the clinical isolate of SARS-CoV-2, hCoV-19/USA/WI-IRI-001/2021 has been sequenced (GISAID: EPI_ISL_5335935).^{1,2} The following mutations are present in the clinical isolate: Spike A222V, Spike A243del, Spike C1253stop, Spike D614G, Spike D950N, Spike E484Q, Spike H655Y, Spike L244del, Spike N185K, Spike P9L, Spike T478R, N (Nucleocapsid) P80R, N S412N, N T205I, NS3 A39del, NS3 F43del, NS3 G44del, NS3 I37del, NS3 L41del, NS3 L46del, NS3 P36del, NS3 P42del, NS3 Q38del, NS3 Q57H, NS3 S40del, NS3 W45del, NS7b L14S, NSP1 (Non-structural protein 1) L122F, NSP2 (Non-structural protein 2) T85I, NSP2 T153A, NSP3 (Non-structural protein 3) K977Q, NSP3 Q774R, NSP3 R748S, NSP4 (Non-structural protein 4) A446V, NSP5 (Non-structural protein 5) V104I, NSP6 (Non-structural protein 6) F108del, NSP6 G107del, NSP6 S106del, NSP12 (Non-structural protein 12) P323L.^{1,2} There is a gap of 51 nucleotides when compared to the reference sequence. It was designated an unnamed Variant Under Monitoring (VUM) by the World Health Organization (WHO).^{1,4}

In December 2019, an outbreak of a respiratory illness (COVID-19) began in Wuhan, Hubei Province, China. The outbreak is associated with a seafood market and although environmental samples from the market are positive for the novel coronavirus, an association with a particular animal has not been determined.⁵ SARS-CoV-2 has been isolated from patients from several countries and the sequences of some of these isolates have been deposited with GISAID.

Material Provided:

Each vial contains approximately 0.1 mL of spin-clarified cell lysate and supernatant from *Homo sapiens* lung adenocarcinoma epithelial cells (Calu-3) infected with SARS-CoV-2, isolate hCoV-19/USA/WI-IRI-001/2021.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:

NR-55697 was packaged aseptically in screw-capped plastic cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

Growth Conditions:

Host: *Homo sapiens* lung adenocarcinoma epithelial cells (Calu-3; ATCC® HTB-55™)

Growth Medium: Eagle's Minimum Essential Medium containing Earle's Balanced Salt Solution, non-essential amino acids, 2 mM L-glutamine, 1 mM sodium pyruvate and 1500 milligrams per liter of sodium bicarbonate supplemented with 2% fetal bovine serum, or equivalent

Infection: Cells should be 70% to 90% confluent

Incubation: 3 to 5 days at 37°C and 5% CO₂

Cytopathic Effect: Cell rounding and sloughing

Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: SARS-Related Coronavirus 2, Isolate hCoV-19/USA/WI-IRI-001/2021 (Lineage B.1.630), NR-55697, contributed by Peter Halfmann and Yoshihiro Kawaoka."

Biosafety Level: 3

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 6th ed. Washington, DC: U.S. Government Printing Office, 2020; see www.cdc.gov/biosafety/publications/bmb15/index.htm.

Disclaimers:

You are authorized to use this product for research use only. This product is not intended for human use.

Use of this product is subject to the terms and conditions of the Emergency Use Simple Letter Agreement (EUSLA) and the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

SARS-CoV-2 materials provided by BEI Resources under the EUSLA are made available for any legitimate purpose, including commercial purposes as long as they are to rapidly prevent, detect, prepare for, and respond to, the spread or transmission of the 2019 SARS-CoV-2. Any further transfer of the original material or any unmodified progeny must be done under the terms of the EUSLA, documented as described above and you must notify BEI Resources of each subsequent transfer. Any new materials made by you that are not the original material or unmodified progeny are excluded from this requirement and you are free to share and commercialize those as your materials.
