

H13 Hemagglutinin (HA) Protein from Influenza A Virus, A/laughing gull/Delaware Bay/451/2018 (H13N6), Recombinant from Baculovirus

Catalog No. NR-58707

This reagent is the tangible property of the U.S. Government.

For research use only. Not for use in humans.

Contributor and Manufacturer:

St. Jude Children's Research Hospital (SJCRH), Memphis, Tennessee, USA, supported under government contract 75N93021C00016, NIAID CEIRR program

Product Description:

A recombinant form of the ectodomain of the H13 hemagglutinin (HA) protein from influenza A virus, A/laughing gull/Delaware Bay/451/2018(H13N6) [also referred to as A/laughing gull/DE/451/2018(H13N6)], with a hexa-histidine tag was produced in Sf9 insect cells using a baculovirus expression vector system and purified using ion exchange and affinity chromatography.¹

Note: The geographical origin (Delaware Bay) of the virus is missing on the vial label.

Material Provided:

Each vial contains approximately 0.25 mL of purified recombinant HA protein in 50 mM Tris (pH 7.8) with 500 mM NaCl and 10% glycerol. The concentration, expressed as mg per mL, is shown on the Certificate of Analysis.

Packaging/Storage:

NR-58707 was packaged aseptically in cryovials. This product is provided on refrigerated bricks and should be stored at 4°C immediately upon arrival. Freeze-thaw cycles should be avoided.

Functional Activity:

NR-58707 is functional in SDS-PAGE, western blot and ELISA.¹

Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: H13 Hemagglutinin (HA) Protein from Influenza A Virus, A/laughing gull/Delaware Bay/451/2018 (H13N6), Recombinant from Baculovirus, NR-58707."

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 6th ed. Washington, DC: U.S. Government Printing Office, 2020; see www.cdc.gov/biosafety/publications/bmbl5/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure the authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
