

***Klebsiella pneumoniae*, Strain MRSN 28183**

Catalog No. NR-55539

This reagent is the tangible property of the U.S. Government.

For research use only. Not for use in humans.

Contributor:

Multidrug-Resistant Organism Repository and Surveillance Network (MRSN), Bacterial Disease Branch, Walter Reed Army Institute of Research, Silver Spring, Maryland, USA

Manufacturer:

BEI Resources

Product Description:

Bacteria Classification: *Enterobacteriaceae, Klebsiella*

Species: *Klebsiella pneumoniae*

Strain: MRSN 28183

Original Source: *Klebsiella pneumoniae* (*K. pneumoniae*), strain MRSN 28183 was isolated in 2008 from a human respiratory sample in North America as part of a global surveillance program.¹

Comments: *K. pneumoniae*, strain MRSN 28183 was deposited as part of the MRSN *Klebsiella pneumoniae* Diversity Panel available from BEI Resources as NR-55604. NR-55539 was deposited as multi-locus sequence type (MLST) ST 199, K-locus type (KL) 154, O-locus type (OL) O2v1 and VIR score 0. MRSN 28183 was deposited as an extensively drug-resistant strain, sensitive to amikacin, ceftazidime/avibactam, ertapenem, gentamicin, imipenem, meropenem and tigecycline, intermediately resistant to piperacillin/tazobactam and resistant to ampicillin/sulbactam, aztreonam, cefepime, ceftazidime, ceftolozane/tazobactam, ceftriaxone, ciprofloxacin, levofloxacin, tetracycline, tobramycin and trimethoprim/sulfamethoxazole. Strain MRSN 28183 is reported to have three aminoglycoside transferase genes [*aac*(6')-Ib-cr5, *aph*(3'')-Ib and *aph*(6)-Id; conferring resistance to various aminoglycosides], three beta-lactamase genes (*bla*_{GES-5}, *bla*_{SHV-1} and *bla*_{TEM-1}; conferring resistance to beta-lactams), two chloramphenicol acetyltransferase genes (*catA1* and *catB3*; conferring resistance to chloramphenicol), one fosfomycin resistance gene (*fosA_gen*; conferring resistance to fosfomycin), one quinolone resistance gene (*qnrB1*; conferring resistance to quinolones), one rifampin ADP-ribosyltransferase gene (*arr-8*-like; conferring resistance to rifampin), two sulfonamide resistance genes (*sul1* and *sul2*; conferring resistance to sulfonamides), one tetracycline resistance gene [*tet*(A); conferring resistance to tetracycline] and two dihydrofolate reductase genes (*dhfrA5* and *dhfrA14*; conferring resistance to trimethoprim).¹ The complete genome of *K. pneumoniae*, strain MRSN 28183 has been sequenced (GenBank: [JAGYDU000000000](https://www.ncbi.nlm.nih.gov/nuccore/JAGYDU000000000)).

K. pneumoniae is a Gram-negative enterobacterium that is a major cause of nosocomial infections of the urinary and respiratory tracts. Due to the extensive spread of

antibiotic-resistant strains, especially of extended-spectrum β-lactamase (ESBL)-producing strains, there has been renewed interest in *Klebsiella* infections.^{2,3,4}

Material Provided:

Each vial contains approximately 0.5 mL of bacterial culture in Tryptic Soy broth supplemented with 10% glycerol.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:

NR-55539 was packaged aseptically in cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

Growth Conditions:

Media:

Nutrient broth or Tryptic Soy broth or equivalent

Nutrient agar or Tryptic Soy agar or Tryptic Soy agar with 5% defibrinated sheep blood or equivalent

Incubation:

Temperature: 37°C

Atmosphere: Aerobic

Propagation:

1. Keep vial frozen until ready for use, then thaw.
2. Transfer the entire thawed aliquot into a single tube of broth.
3. Use several drops of the suspension to inoculate an agar slant and/or plate.
4. Incubate the tube, slant and/or plate at 37°C for 1 day.

Citation:

Acknowledgment for publications should read “The following reagent was obtained through BEI Resources, NIAID, NIH: *Klebsiella pneumoniae*, Strain MRSN 28183, NR-55539. This strain is part of the *Klebsiella pneumoniae* Diversity Panel provided by the Multidrug-Resistant Organism Repository and Surveillance Network (MRSN) at the Walter Reed Army Institute of Research (WRAIR).”

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 6th ed. Washington, DC: U.S. Government Printing Office, 2020; see www.cdc.gov/biosafety/publications/bmb15/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
