

# Product Information Sheet for HRP-20365

**Monoclonal Anti-Simian-Chimpanzee Immunodeficiency Virus Type 1 (SCIV-1) gp120 V2, Recombinant Macaque Antibody, Clone T927\_w62\_P1B05 (produced *in vitro*)**

**Catalog No. HRP-20365**

**Lot No. 70071191**

This reagent is the tangible property of the U.S. Government.

**For research use only. Not for use in humans.**

## Contributor and Manufacturer:

Dr. Frederic Bibollet-Ruche, Research Assistant Professor, Departments of Medicine and Microbiology, Perelman School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania, USA, supported in part by NIH grants R01 AI 050529, R37 AI 150590, R01 AI 160607, P01 AI 131251 and R61 AI 161818

## Product Description:

HRP-20365 is a recombinant monoclonal antibody cloned from a purified single B cell isolated from rhesus macaque (animal ID T927; lineage 5) infected with chimeric simian-chimpanzee immunodeficiency virus (SCIV-CAM13K) with an engineered gp120 variable loop 2 (V2) of the Env protein, 62 weeks post-infection.<sup>1,2</sup> It was produced in Expi293F cells by cotransfecting paired heavy and light chain immunoglobulin expression plasmids, purified from culture supernatants by rProtein A/Protein G GraviTrap™ column chromatography, and buffer-exchanged into phosphate-buffered saline (PBS).<sup>2</sup>

HRP-20365 recognizes the V2-apex epitopes of the gp120 protomers and exhibits various degrees of cross-reactivity and potency to human immunodeficiency virus type 1 (HIV-1) strains in neutralization assays.<sup>1</sup> The epitope bound by HRP-20365 recognizes a distinct conformation of the Env glycoprotein epitope than that recognized by V2-specific monoclonal antibodies ARP-12550 and ARP-12141.<sup>1</sup> This antibody can be used to detect the presence of unwanted Env conformation in immunogens designed to elicit broadly neutralizing antibodies by vaccination.

## Material Provided:

Each vial contains approximately 50 µg of purified monoclonal antibody in PBS (pH 7.2) at a concentration of 1 mg/mL.

## Packaging/Storage:

HRP-20365 was packaged aseptically in cryovials. The product is provided frozen on dry ice and should be stored at -20°C or colder immediately upon arrival. Freeze-thaw cycles should be minimized.

## Citation:

Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: Monoclonal Anti-Simian-Chimpanzee Immunodeficiency Virus Type 1 (SCIV-1) gp120 V2, Recombinant Macaque Antibody, Clone T927\_w62\_P1B05 (produced *in vitro*), HRP-20365."

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories (BMBL). Current Edition. Washington, DC: U.S. Government Printing Office.

## Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at [www.beiresources.org](http://www.beiresources.org).

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

## Use Restrictions:

**This material is distributed for internal research, non-commercial purposes only.** This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
