

Lactobacillus jensenii, Strain EX849587VC06

Catalog No. HM-374

Product Description:

Lactobacillus jensenii (*L. jensenii*), strain EX849587VC06 was isolated in March 2010 from a human mid-vaginal wall in Richmond, Virginia, USA. HM-374 was produced by inoculation of BEI Resources seed lot 59852201 into Lactobacilli MRS broth and grown for 1 day at 37°C in an aerobic atmosphere with 5% CO₂. The material from the initial growth was passaged once in Lactobacilli MRS broth for 2 days at 37°C in an aerobic atmosphere with 5% CO₂ to produce this lot.

Note: Quality control of HMP material is only performed to demonstrate that the material distributed by BEI Resources is identical to the deposited material. It should not be considered a complete characterization of the deposited organism.
