

## **Certificate of Analysis for NR-19717**

## Vibrio cholerae Gateway® Clone Set, Recombinant in Escherichia coli, Plate 39

## Catalog No. NR-19717

This reagent is the tangible property of the U.S. Government.

**Product Description:** The *Vibrio cholerae* Gateway<sup>®</sup> clone set consists of 46 plates which contain 3813 validated clones from *Vibrio cholerae*, strain El Tor N16961, cloned in *Escherichia coli* DH10B-T1 cells.

<u>Note:</u> Production in the 96-well format has increased risk of cross-contamination between adjacent wells. Individual clones should be purified (e.g. single colony isolation and purification using good microbiological practices) and sequence-verified prior to use. BEI Resources cannot confirm or validate any clone not identified on the plate information table found on the Product Sheet.

Lot<sup>1</sup>: 59827205 Manufacturing Date: 13MAY2011

| TEST                                 | SPECIFICATIONS | RESULTS  |
|--------------------------------------|----------------|--|
| Viability (post-freeze) <sup>2</sup> | Report results | Growth from inoculated wells   |
| Purity (post-freeze) <sup>2</sup>    | Report results | Wells with growth exhibit single colony type consistent with<br>Escherichia coli |

<sup>&</sup>lt;sup>1</sup>24 hours at 37°C and aerobic atmosphere on Luria Bertani agar with 50 µg/mL kanamycin.
