

Late-Immune Dengue Virus Type 1 Antisera

Catalog No. NR-41786

This reagent is the property of the U.S. Government.

Product Description: NR-41786 is a pool of late-immune sera from a non-human primate (NHP) that was immunized with dengue virus type 1, Western Pacific.¹ Antisera was collected at approximately 30-day intervals from Day 120 through Day 390, and then pooled.

Lot: 61258677

Manufacturing Date: AUG2011

¹The dengue virus type 1, Western Pacific preparation that was used to immunize the NHP was propagated in Vero cells.

²Serum dilution at which 50% neutralization occurs

³The viruses used in the FRNT assay were propagated in Vero cells and the FRNT assay was performed in Vero cells.

⁴The viruses used in the FRNT assay were propagated in C6/36 cells and the FRNT assay was performed in C6/36 cells.

⁵Not done
