

Monoclonal Anti-Crimean-Congo Hemorrhagic Fever Virus Pre-Gn Glycoprotein, Clone 7F5 (produced *in vitro*)

Catalog No. NR-40281

This reagent is the property of the U.S. Government.

Product Description: Mouse monoclonal antibody prepared against the Crimean-Congo hemorrhagic fever virus (CCHFV) Pre-Gn glycoprotein was purified from clone 7F5 hybridoma supernatant by protein G affinity chromatography.

Lot: 61598457

Manufacturing Date: 24APR2013

TEST	SPECIFICATIONS	RESULTS
Antibody Class Determination	IgG1k	IgG1k
Experion Pro260 Analysis	Correct molecular weight (MW) for heavy and light chains Report results	Correct MW for heavy and light chains 99.2% pure
Concentration by Spectrophotometer at OD ₂₈₀	Report results	1.3 mg per mL
Functional Activity¹ Indirect immunofluorescence assay (IFA) titer ² Plaque reduction neutralization test (PRNT) titers PRNT ₅₀ ³ PRNT ₈₀ ⁴	Report results Report results Report results	128000 ≤ 40 ≤ 40
Sterility	0.22 µm filter-sterilized	0.22 µm filter-sterilized

¹Testing performed at U.S. Army Medical Research Institute of Infectious Diseases

²The IFA titer is defined as the reciprocal of the lowest antibody dilution where glycoprotein staining was clearly visible above background in CCHFV IbAr10200-infected Vero E6 cells.

³The PRNT₅₀ is defined as the reciprocal of the antibody dilution required to reduce the number of CCHFV IbAr10200 plaques in Vero E6 cells by 50% relative to the control wells.

⁴The PRNT₈₀ is defined as the reciprocal of the antibody dilution required to reduce the number of CCHFV IbAr10200 plaques in Vero E6 cells by 80% relative to the control wells.

Date: 19 MAR 2014
