

Plasmodium berghei, Strain Berred.i

Catalog No. MRA-1261

Product Description:

Plasmodium berghei (*P. berghei*), strain Berred.i is a pyrimethamine-sensitive and mCherry expressing recombinant strain, which was generated by integration of *P. berghei* adaptable transfection vector pBAT-M6 into *P. berghei*, strain ANKA Cl15cy1 (BEI Resources Catalog No. MRA-871). MRA-1261 was produced by inoculation of deposited material into BALB/c mice. Infection was allowed to progress for 4 days. Infected blood was collected by retro-orbital bleeding and used to inoculate BALB/c mice. Infection was allowed to progress until parasitemia reached > 5%. After 3 days, infected blood was collected by retro-orbital bleeding.
